Introduction

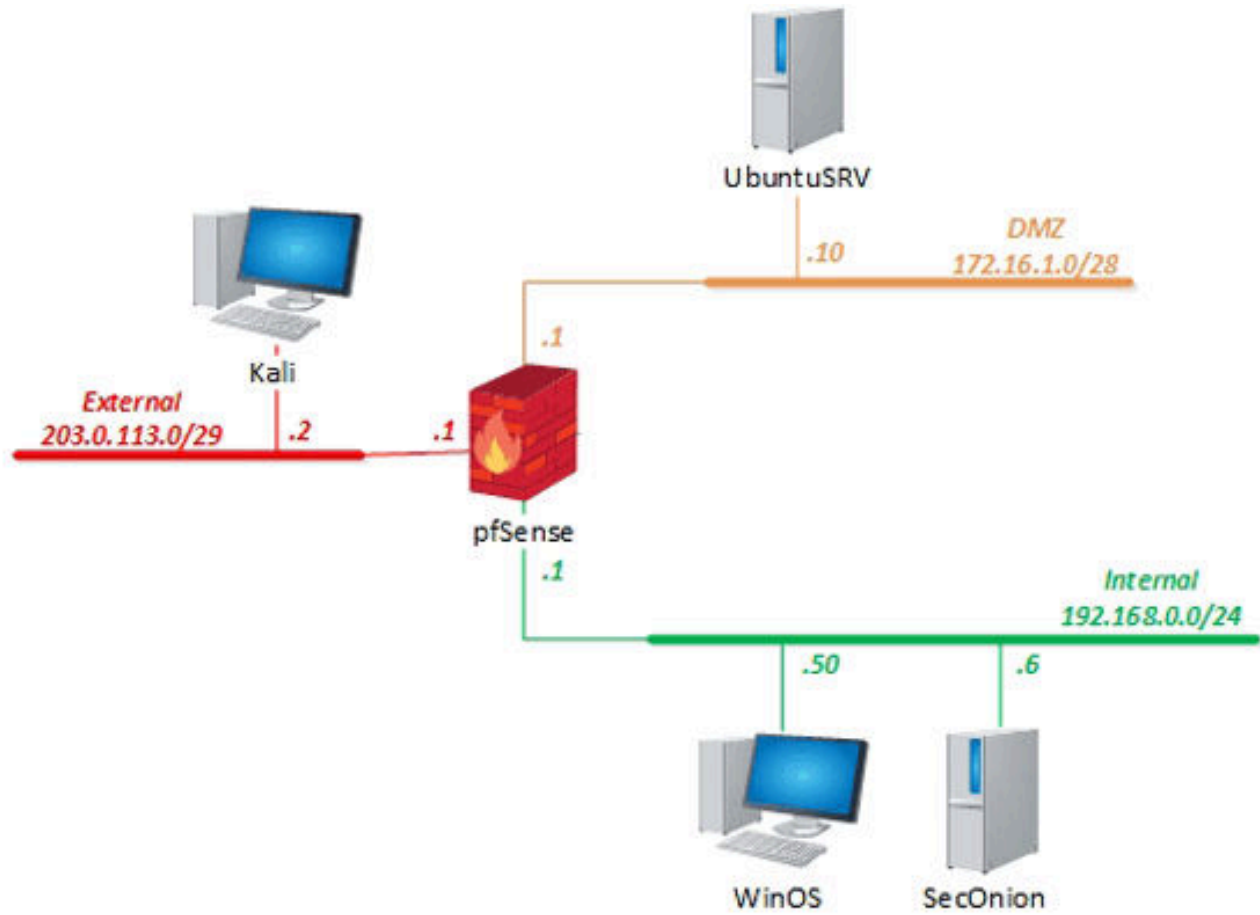

This lab contains no actual lab instructions but instead serves as an open environment so that you can freely access all the virtual machines in the *NDG Security+ v4* pod environment.

Objective

In this lab, you will perform the following tasks:

- The *Cyber Range* option can be used for multiple purposes, such as booting up all virtual machines available in the pod, providing additional practice on your own or for custom labs, and troubleshooting any problems if an administrator.

Lab Topology

Lab Settings

The information in the table below provides basic information related to the virtual machines in the pod environment.

Virtual Machine	IP Address	Account (if needed)	Password (if needed)
Kali	203.0.113.2	kali	kali
pfSense	192.168.0.1	sysadmin	NDGlabpass123!
SecOnion	192.168.0.6	sysadmin	NDGlabpass123!
UbuntuSRV	172.16.1.10	sysadmin	NDGlabpass123!
WinOS	192.168.0.50	Administrator	NDGlabpass123!
